Safety Tip of the Week
Space Heater Safety

AFRH Safety Office wants to remind you that portable space heaters can place you at risk if used improperly. Following the guidelines below will greatly reduce that risk.

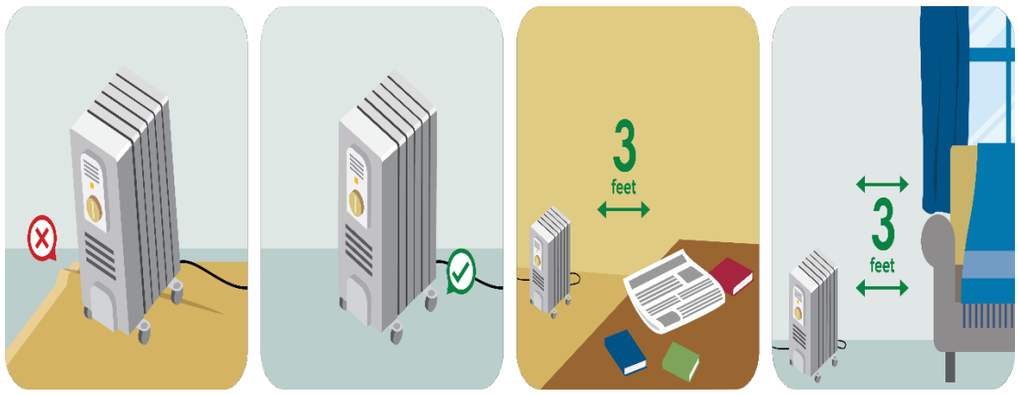

Have a 3-foot safety zone around heaters:

Place portable space heaters at least 3 feet from anything that can burn.

Place space heaters on a solid, flat surface:

Keep them from things that can burn.

Inspect your Space Heater:

Inspect for cracked or damaged cords and broken plugs.
Plug space heaters directly into wall outlets and never into an extension cord or power strip.
